

Cloud Migration Case Study

Karaikal Port Pvt. Ltd's success story with Vaultastic

About Karaikal Port Pvt. Ltd.

karaikal port

Karaikal Port Private Limited (KPPL), is a private port, located near the town of Karaikal in the Union Territory of Pondicherry, India, and was commissioned in April 2009. Since start of operations, the port has handled diverse cargo such as Coal, Sugar, Cement, Fertilizers, Project cargo, Agro commodities, Liquid cargo and Containers. Karaikal port is congestion free and well equipped with modern infrastructure in water facing and on shore facilities, which enables efficient transportation of goods. The company faced the challenge of being unable to look through the email boxes of all users for knowledge, information, patterns, and intelligence, without a major effort of collating PST files and searching through them all.

THE CHALLENGE

For a majority of the users, mails were downloaded and retained on their PCs via MS Outlook as PST files. As the company deals with numerous vessels on a daily basis, there is a lot of cross-communication that takes place. Critical users on field often need to refer back to older mails to solve emergencies or prepare documentation based on mail sent before the arrival of a vessel. They had to look through the PST files (a daunting task) to find relevant mail and information. There was a requirement for a safe, reliable back up solution, where knowledge and information could be accessed easily at any time and from any place.

THE SOLUTION

With Vaultastic, the email are automatically archived from the primary mail platform, SkyConnect, without any infrastructure or manual intervention from the Karaikal team. These users are no longer required to store mail on their individual machines as they are assured that each mail will be available at all times on the Vaultastic cloud. The unlimited storage on all plans has simplified provisioning with no need to keep worrying about storage filling up. The compliance officer or managers can now use ediscovery to search across the entire communication of all users, instantly.

THE BENEFITS

Zero Infrastructure

Karaikal Port no longer has any infrastructure to maintain or manage since Email are backed up directly to the cloud.

Improved Productivity

All mail are safely archived on the cloud, available via one console, making it easier to refer to old mail, increasing productivity.

Uncover Trapped Knowledge

Ediscovery, using complex search patterns, even within attachments, has helped Karaikal uncover hidden insights and trapped knowledge.

ABOUT MITHI SOFTWARE TECHNOLOGIES AND AWS

Mithi's collaboration platforms, give you access to secure, dependable, and an always connected collaboration environment, helping you reduce operational costs and gain productivity. Giving your business what we call the 'Collaboration Advantage'.

Migrating your applications to the AWS Cloud gives you access to on-demand IT resources that can help you innovate faster, reduce costs, and operate more securely.
